FEATURES

RHS London Orchid Show
Photographs of unusual species on display. Plus a round-up of the Gold medal stands and cash-prize winners
SARAH FORSYTH 76-79

A visit to the Eric Young Orchid Foundation
Revealing new successes in orchid breeding, and the latest developments in a range of genera, shown

to members of the RHS Orchid Committee during their study day at the Foundation in Jersey, in January this year.
CLARE and
JOHAN HERMANS 80-90

Three new species of *Maxillaria*, and two rediscovered species
Describing and illustrating three new species – showy species *M. colombiana*, *M. tectasepala* with its unusual flowers, and miniature species, *M. ortizii*. Followed by discussing and illustrating two species thought to be lost, *M. patens* and *M. langlassei*, all of which are from Colombia.
ERIC CHRISTENSON 91-99

The genus *Ascoglossum*

Discussing and illustrating this monotypic genus in the *Aeridinae*, with its attractive, little-known single species, *Ascoglossum calopteryum*
WILLIAM CAVESTRO 100-103

The strange case of *Dendrobium aphyllum*

Reconsidering the mystery of identity surrounding *Dendrobium aphyllum* and *Dendrobium macrostachyum*. This was believed to have been solved, but here, a re-examination of the evidence, particularly the historic illustrations of the species, lead the author to a different conclusion.
ANDRÉ SCHUTTEMAN 104-110
